LAB Cal™

A water laboratory data management system specifically designed for drinking water and wastewater applications, LAB Cal provides easy-to-use sample scheduling and tracking tools for effective lab data management. Time saving features, familiar formats, simple workflows, and pricing that is far lower than traditional LIMS systems make LAB Cal a very robust and cost-effective solution.

The visual environment shows sample status at a glance.

Easy to Use and Cost-Effective

Hach LAB Cal is an affordable and simple-to-use alternative to complex and expensive LIMS systems. The visual environment provides tools, libraries and familiar data entry forms making it easy to set up and use the software.

- Create and schedule samples by entering key data and choosing tests from the modifiable Methods Library.
- Shorten learning time with manual data entry sheets that can be designed to match current bench sheets.
- Schedule samples using a wide variety of scheduling options, from standard recurrence patterns to customized schedules.
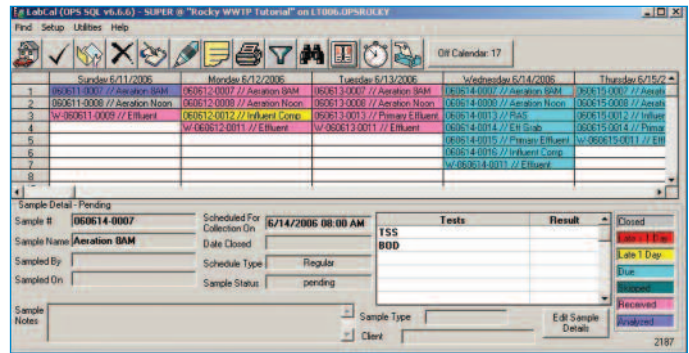

Easily Track Your Lab's Critical Information

The software builds a calendar that displays the status of all samples at a glance. The laboratory's data is stored in a secure database and can only be accessed by authorized personnel.

- Easily identify unique sample IDs, tests and methods to be run, chain of custody, and other sample details.
- Use familiar bench sheets to assign samples by method.
- Print bar-coded sample labels from the calendar.
- Use to track NELAC compliance.

Business and Regulatory Reports Provide Accurate Information

Manage operations with easily generated reports.

- Certificate of Analysis, Chain of Custody, Quality Analysis/Control, missing sample, exception reports, and more.
- All regulatory reports such as National Pollutant Discharge Elimination System (NPDES) reports or Surface Water Treatment (SWTR) reports.

Use familiar bench sheets to capture data.
Use intelligent interfaces to capture data automatically.

Run Certificate of Analysis, Chain of Custody, and Quality Analysis/Control reports with a few keystrokes.

A Powerful Solution

Use LAB Cal as an affordable stand-alone lab solution or add it to your Hach WIMS(TM) solution. Integrate data from across drinking water and wastewater systems into into a secure database. Compare laboratory data to process and field data; generate regulatory and business reports. Use graphs for easy analysis and visualization of information.

LAB Cal provides accurate, secure information, allowing you to make more informed decisions.

Be Right™

Expand Your Hach LAB Cal Capabilities...

Get even greater flexibility and efficiency.

Intelligent Interfaces

Increase accuracy and save time with interfaces that automate data imports.

- Import data and reports from commercial labs.
- Import data from lab instruments and all SCADA or data historian systems.
- Define how and when data is imported: approved, unapproved, summarized, calculated, etc.

On-Line or On-Premises

Get the convenience of access anywhere, anytime with the affordable subscription service, or install LAB Cal at your site.

Also Look For...

Hach Water Information Management Solution™ (Hach WIMS™)

Provides comprehensive and accurate information from all data sources, to allow more informed decisions. The software is available as a local, web-based, or enterprise solution with flexible payment options. (See LIT2644)

Hach JOB Cal®

Easy, cost-effective maintenance scheduling solution. The software automatically builds an interactive color-coded calendar for easy management of your job activities. Hach JOB Cal also provides the ability to track purchasing, inventory, vendors and labor as well as display equipment drawings and pictures. (See LIT2645)

Hach BOD Manager™

Reads data directly from the Hach HQ40d LBOD meter and automates your BOD bench sheets. It automatically calculates BOD, checks validity based on standard methods and user-defined criteria, then securely stores the information. (See LIT2646)

Hach Expert Services

Hach offers a comprehensive set of services, such as training, programming, installation assistance, set up, configuration, and other specific customer requests to ensure successful use of Hach software. These services can be delivered over the web, at a Hach facility or at your facility.
